2017

SSBOS AFFILIATE REPORT

Girls Inc. of Greater Los Angeles

Thank you for your participation in the 2017 Girls Inc. Strong, Smart, and Bold Outcomes Survey (SSBOS). The data collected through your affiliate's hard work will be highly valued as we continue to provide all girls with a high quality Girls Inc. Experience.

Attached are the survey results associated with the girls who took the survey at **Girls Inc. of Greater Los Angeles.** The answer choices for each question are included within each table. Two surveys were administered: Youth (Ages 9-12) and Teen (Ages 13 and up). If a question was only asked of one survey age group, it will be indicated in the title of each question group. Questions asked of both survey age groups will provide counts, valid percentages, and totals for each group individually as well as both age groups together.

During the data cleaning process, girls who chose not to take the survey (did not give assent) or reported answering the survey questions dishonestly were removed from the final dataset. **In 2017, 0 Girls Inc. of Greater Los Angeles records were removed for lack of assent, and 10 for honesty.**

The report begins with aggregated demographic data retrieved from the TraxSolutions system, followed by data tables representing each survey topic/question. The tables display the counts (frequencies) and percentage of responses to each question and are arranged within five sections: Demographics, Strong, Smart, Bold, and the Essential Elements of the Girls Inc. Experience. Below is a glossary of useful terminology to help you navigate the data tables.

Please keep in mind, the data contained within this report represent the views and behaviors of the girls who participated in the survey, and cannot be generalized as those of all girls at your affiliate or of all girls across the Girls Inc. network.

We hope you will use these results to promote staff development, enhance programming, as well as improving and communicating the success of the Girls Inc. Experience.

COUNT: The number of occurrences or frequencies of each survey response.

VALID N PERCENT: The proportion of each survey response, not including missing responses.

(SYSTEM) MISSING: Missing counts in the Demographic section reflects information that has not been entered in the TraxSolutions system.

MISSING: Even if asked, not all girls answered all questions. User missing includes the number of participants who were asked the question but chose not to answer.

QUESTIONS? Please contact the Research & Evaluation Department at research@girlsinc.org
